Dancing of the superior order is a pleasant diversion. But It is something more. It is an art which combines all the advantages of what is known as physical ending with the development of a graceful deportment and a stimulus to artistic solitore. The practice of classical or renascent densing is specially beneficial to children. It promotes vigor and agility, an ensures their retention through middle and selvanced age. Educational experts are now according the importance of classical changing as a branch of education, and in many places throughout the world it has superseded the more sever-and in many perpts, less efficient purely physical exercises.

Why Not a Holiday?

"Cet away from your work and take a bolisty" is a prescription frequently handed out by members or the medical profession to the pasted city office worker. The advice is usually based on the prediction that the eternal grind of routine work day in and day out, week after week and month after month has impaired the nerves and that change of scenery and mew activities is all that its required to steady the nerves and tone up the

month after month has impaired the nerves and that change of scenery and new activities is all that is required to steady the nerves and tone up the flagging system.

Excellent advice unquestionably, but surely as applicable to the man and the woman on the farm and to the small town or village merchant or worker as to the delizers of the larger centres.

As a matter of fact the former toods are probably in greater need. The second that no one has sustained a continuous barrage of hard knocks and trying conditions more than the man on the land and his family who have withstood a tremendous and prolonged siege against the combined forces of economic and agricultural depression.

The farmer and his wife and the occupant of the man towns and the company of the second of the secon
